PROJECT GOAL

Develop a university management system that automates academic workflows for:

- Students
- Teachers
- Managers
- Admins
- Researchers

MAIN FEATURES

- User authentication
- Course management
- Registration system
- Research subsystem
- Schedule management
- Role-based dashboards

MAIN CLASSES

- UniversityKernel
- User
- Student
- Teacher
- Manager
- ResearchProject
- Page

FUNCTIONALITY DEMO

USER ROLES & CAPABILITIES

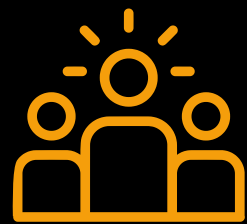

Role	Features
Student	Register courses, view schedule
Teacher	Manage courses, students
Manager	User management
Admin	System administration
Researcher	Research projects & papers

KEY IMPLEMENTED MODULES

- LOGIN SYSTEM
- COURSE REGISTRATION
- USER MANAGEMENT
- RESEARCH CABINET
- SCHEDULE PAGES
- DASHBOARD NAVIGATION

GITHUB REPOSITORY

[HTTPS://GITHUB.COM/NONAME376/OOP-PROJECT.GIT](https://github.com/Noname376/OOP-Project.git)

RESULTS

SUCCESSFULLY IMPLEMENTED

- Multi-role university system
- OOP-based architecture
- Console page navigation
- Research subsystem
- Git collaborative workflow

WHAT WE LEARNED

- Team collaboration with GitHub
- Real project structure
- OOP architecture design
- Java application organization
- Version control workflow

THANK YOU!
